PROFILE SUMMARY

A final year Graduate student in Computer Science Engineering with problem solving skills, hardworking, focused and has strong foundation in programming languages like python. Seeking a challenging full-time position to grasp my skills in real-world projects and contribute to innovative solutions.

EDUCATION

- **Siksha ‘O’ Anusandhan** Bhubaneswar, India
Computer Science and Engineering; CGPA: 8.94 Graduation Year: 2025
- **DAV Public School** Jamshedpur, India
12th grade: 77.6 percent (PCM with Computer Science) Graduation Year: 2021
- **DAV Public School** Jamshedpur, India
10th grade: 92 percent Graduation Year: 2019

EXPERIENCE AND PROJECTS

- **Mahindra Comviva** Remote
Trainee Present
A training-cum-certification AI/ML program.
 - Completed an in-depth training program focused on Artificial Intelligence and Machine Learning
 - Enhanced skills in Python programming language and gained hands-on experience with machine learning algorithms, data processing.
 - Worked on real-world projects to apply AI/ML concepts in practical scenarios.
- **Automating Web Data Scraping using BeautifulSoup and Selenium** Ongoing
Personal Project
 - Developed Python-based task automation script using BeautifulSoup and Selenium to scrape, parse, and extract data from dynamic web pages, improving efficiency in data collection
 - Designed and implemented reusable automation workflows, utilizing exception handling and browser control, to streamline business processes and improve overall productivity.
- **Personal Expense Tracker with Python and MySQL** Completed
Personal Project
 - Developed a Personal Expense Tracker application using Python and MySQL, implementing core functionalities such as expense logging, updating, deleting, and generating reports with SQL queries.
 - Implemented a user-friendly interface with Tkinter and leveraged MySQL to provide robust, scalable solutions for multi-user environments, enhancing user experience and system reliability.

AWARDS AND ACHIEVEMENTS

- **Leetcode:** 50 Days Badge 2023, Completed Aug LeetCode Challenge 2024
- **Completed PwC Launchpad Program:** A Program that gives an industry ready knowledge in IT fundamentals (with SDLC), RDBMS, Java fundamentals, DevOps, and frontend development.

PROGRAMMING SKILLS

- **Languages:** Python, MySQL, Linux, Java, Javascript
